16. – 17. sorularda, paragrafta verilen boşluğu en iyi şekilde tamamlayan ifadeyi bulunuz .

16) Animals' body plan becomes fixed as they develop, usually early on in their development as embryos, although some undergo a process of metamorphosis later on in their life. Animals have several characteristics that set them apart from other living things. Animals are eukaryotic and usually multicellular, which separates them from bacteria and most protists. They are heterotrophic, generally digesting food in an internal chamber, which separates them from plants and algae._____ . All animals are motile, if only at certain life stages. Embryos pass through a blastula stage, which is a characteristic exclusive to animals.

- A) Animals are a major group of multicellular organisms, of the kingdom Animalia or Metazoa
- B) Most animals are motile; that is, they can move spontaneously and independently.
- C) In addition, they lack the complex organization found in most other phyla and similar species
- D) Moreover, they are also distinguished from plants, algae, and fungi by lacking cell walls
- E) They are either used directly to help the animal grow, or broken down, releasing stored solar energy, and giving the animal the energy required for motion

17) The principle of dependence is one that has a huge role on social order as a whole. It states that the more dependent a person is on a group, the more likely they are to conform to group "norms"._____ . An example of this would be Greek Life at a College or University. If belonging to a group like this is very important to someone, they will be more likely to conform to group norms and participate in hazing and other illegal activities in order to gain the groups trust and respect. In this case, the status that the group gives a person is more important than what they lose by conforming to the group's norms.

- A) This means that if a group means a lot to a person, they will be more likely to do what it is that the group wants them to.

B) However, the "problem of social order," how and why it is that social orders exists at all, is historically central to sociology

C) One other view is that it refers to a set of linked social structures, social institutions and social practices which conserve, maintain and enforce "normal" ways of relating and behaving

D) Simply put, it states the more norms and the more important the norms are to a society, the better these social-economic norms tie in and hold together the group as a whole

E) In some instances, a certain lifestyle usually distinguishes the members of different status of the former groups

18. – 21. sorularda, paragrafta verilen boşluğu en iyi şekilde tamamlayan ifadeyi bulunuz .
